The response to the **COVID-19** pandemic by the global biopharmaceutical industry over the past fourteen months **has** been unprecedented. From December 30, 2019, when SARS coronavirus was first detected in a patient sample, and January 10, 2020, when the complete genome of severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) was released, multiple treatments and vaccines have been developed and approved for use in combating **COVID-19**. And the rapid development of these treatments and ...

They agreed, at least temporarily, to throw money at it with the \$1.9 trillion **Covid-19** bill known as **American** Rescue Plan (ARP). But the ARP will not alter the structural inequities, either by raising the minimum wage to \$15.00 an hour or imposing taxes and regulations on corporations or the billionaire class that saw **its** wealth increase by a staggering \$1.1 trillion since the start of the pandemic. The health system will remain privatized, meaning the insurance and **pharmaceutical** ...
